

Завдання: Додай в Postman тести, що перевіряють що запит повернув 200/404 та ім'я користувача в тілі одного із запитів.

Передумова: [Відкрито посилання в браузері https://petstore.swagger.io/v2/user](https://petstore.swagger.io/v2/user)

The screenshot shows the Postman interface with a workspace named 'My Workspace'. The left sidebar shows a collection of API endpoints under 'Petstore' and 'Users'. The main panel displays a POST request to 'https://petstore.swagger.io/v2/user'. The 'Scripts' tab is active, showing two tests:

```
1 pm.test("Status code is 200", function () {
2   pm.response.to.have.status(200);
3 });
4 pm.test("Status code is 200", function () {
5   pm.response.to.have.status(404);
6 });
```

The 'Test Results' tab shows the following results:

- PASS** Status code is 200
- FAIL** Status code is 200 | AssertionError: expected response to have status code 404 but got 200

The screenshot shows the Postman interface with a workspace named 'My Workspace'. The left sidebar shows a collection of API endpoints under 'Petstore' and 'Users'. The main panel displays a GET request to 'https://petstore.swagger.io/v2/user/{username}'. The 'Scripts' tab is active, showing one test:

```
1 pm.test("Response contains string olga", function () {
2   var responseBody = pm.response.json();
3   pm.expect(responseBody.username).to.
4     have.string("olga");
5 });
```

The 'Test Results' tab shows the following result:

- PASS** Response contains string olga
